Author: Akiko Takano

Website: <http://www.r-labs.org/projects/issue-template>

Code repository: https://github.com/akiko-pusu/redmine_issue_templates

Registered on: 2012-04-05 (almost 7 years ago)

Current version: 0.3.1

Compatible with: Redmine 4.1.x, 4.0.x

User ratings: (27)

Plugin to generate and use issue templates for each project to assist issue creation.

Features

- It works as project module.
- Member who has "Manage Template" right can create issue templates **based on trackers**.
 - Also add help message for templates, because the way to use templates may be different between projects.
- Member who has "Use Template" right can see the template and use them when creating new issue.

Please see for more details and usage.

- http://www.r-labs.org/projects/issue-template/wiki/About_en

Source / Download

- https://github.com/akiko-pusu/redmine_issue_templates
 - Bitbucket mercurial repository is obsoleted and not maintenance. Please clone from Github repository.
- Build Status  (CircleCI)
 - https://circleci.com/gh/akiko-pusu/redmine_issue_templates

Installation notes

Migration is required.

1. Copy the plugin directory into the vendor/plugins directory.
2. Do migration task. (e.g. rake redmine:plugins:migrate RAILS_ENV=production)
3. (Re)Start Redmine.

This feature now works as project module. So you need set permissions to manage/show/edit template at the redmine settings as administrator.

Changelog

0.3.1 (2019-03-10)

Compatible with Redmine 4.1.x, 4.0.x.

0.3.1 Changelog:

- Basic feature implemented of note template.
- Enabled to use issue templates when updating issue.
 - Go to global template admin setting, and turn on "apply_template_when_edit_issue" flag.
- Bugfix: Prevent conflict against issue controller helper. (#217)
- Update readme: Merged PR #219. Thanks Arnaud Venturi!

NOTE: This version requires migration command to use note template feature.

```
$ rake redmine:plugins:migrate RAILS_ENV=production
```

0.2.1 (2018-11-04)

Compatible with Redmine 3.4.x, 3.3.x, 3.2.x, 3.1.x, 3.0.x.

0.2.1

Download: https://github.com/akiko-pusu/redmine_issue_templates/releases/tag/0.2.1 (tgz, zip)

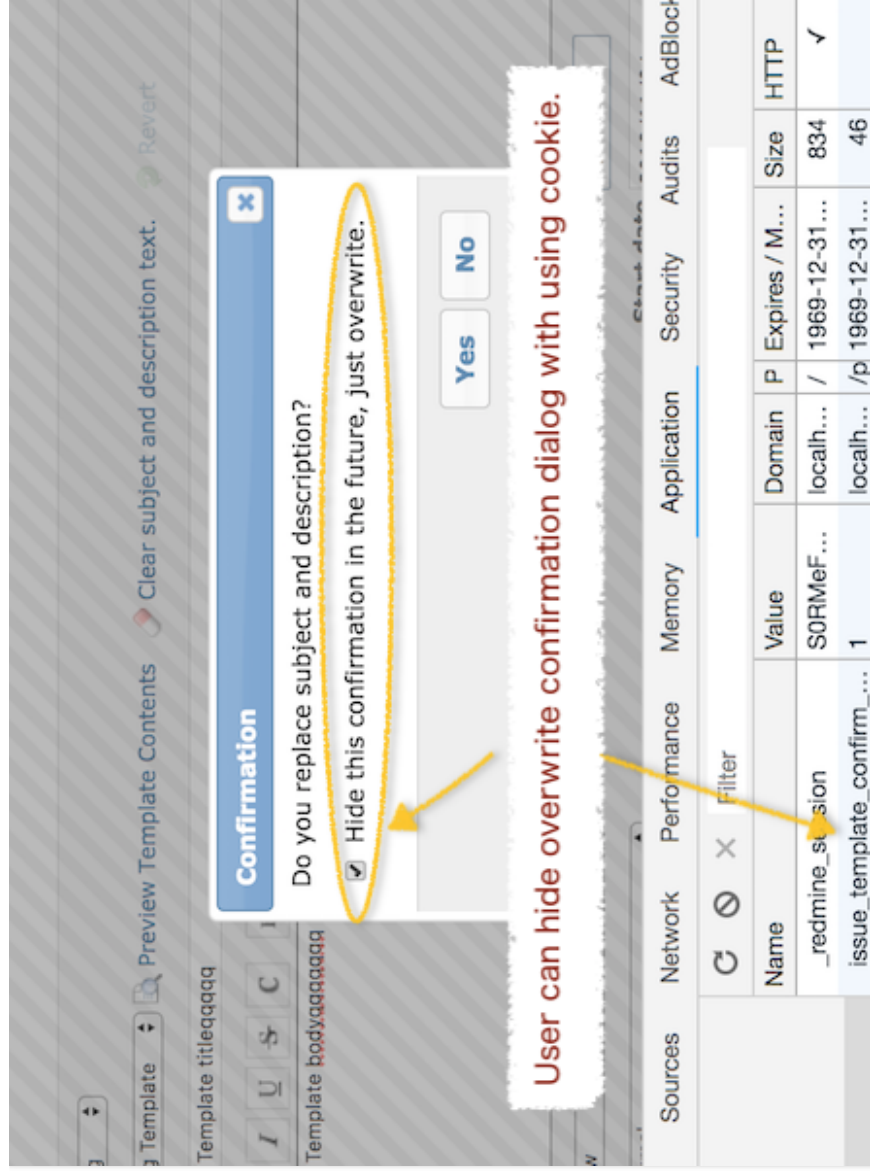

Mainly, bugfix and refactoring release.

Updating to 0.2.1 is highly recommended in case using **CKEditor** or **MySQL replication**.

NOTE: **Migration is required**, especially using MySQL replication.

- Bugfix: Fix "Page not found" error when try to create project template from project setting. (GitHub: #192, #199)
- Bugfix: Add composite unique index to support MySQL group replication. (GitHub: #197)
- Workaround: Wait fot 200 msec until CKE Editor's ajax callback done. (GitHub: #193)
- Add feature to hide confirmation dialog when overwritten issue subject and description, with using user cookie. (GitHub: #190)
- Refactoring: Minitest and so on.

A cookie named "issue_template_confirm_to_replace_hide_dialog" is stored from this release. (Related GitHub: #190)

screenshot-0.2.1.png - User can hide overwriting confirmation popup (180 KB) Akiko Takano, 2018-11-04 13:17
0.2.0 (2018-05-28)

Compatible with Redmine 3.4.x, 3.3.x, 3.2.x, 3.1.x, 3.0.x.

0.2.0

This is **bugfix** and refactoring release.
Updating from v0.1.9 to 0.2.0 is **highly recommended**.
This version can be applied to Redmine 3.0 to Redmine 3.4.
Also some features implemented by v0.1.9 are available.

Download: https://github.com/akiko-pusu/redmine_issue_templates/releases/tag/0.2.0

Changelog

In this release, some methods which implemented on Redmine v3.3 are ported for plugin's compatibility. (To support Redmine 3.0 - 3.4)

- Bugfix: Prevent to call unimplemened methods prior to Redmine3.2. (GitHub: #180)
- Refactoring: Code format. (JS, CSS) / Update config for E2E test.
- Updated Simplified Chinese translation, thanks Steven.W. (GitHub PR: #179)
- Applied responsive layout against template list (index) page.

0.1.9 (2018-04-03)

Compatible with Redmine 3.4.x, 3.3.x, 3.2.x, 3.1.x, 3.0.x.

0.1.9

Bugfix and refactoring release.

- Bugfix: Fix wrong template sort ordering. (GitHub: #174)
- Change UI to reorder templates with using drag and drop.
- Add feature to copy template (Now project scope template only.)

- Code refactoring. Use Headless Chrome for feature spec. Change to use CircleCI for build and test.
- PR: Update Bulgarian translation. Thank you so much, Ivan Cenovi! (GitHub: #171)
- PR: Update Update pt-BR.yml! Thank you so much, Adriano Baptistella! (GitHub: #173)
- Bugfix: Wrong column label in "Preview Template Contents" modal dialog. (GitHub: #154)
- PR: Updates to German language file. Thank you so much, Tobias Fischer! (GitHub: #164)

0.1.8 (2017-08-05)

Compatible with Redmine 3.4.x, 3.3.x, 3.2.x, 3.1.x, 3.0.x.

Bugfix release.

- Bugfix: Prevent "undefined local variable or method" error when listing project orphaned templates. (GitHub: #150)
- PR: Add Portuguese translation. Thank you so much, Adriano Baptistella! (GitHub: #149)
- Change url of Redmine Plugin Directory. (Changed identifier from issue_templates to redmine_issue_templates.)

0.1.7 (2017-07-23)

Compatible with Redmine 3.4.x, 3.3.x, 3.2.x, 3.1.x.

Bugfix release, and some code refactorings.

Bugfix:

- After related tracker is removed, index (list) templates failed with exception. (GitHub: 139)
- Checklist not loading from Template. (GitHub: 141)

Now you can find orphaned templates from template index page. (Both project scope and Global scope.) Also orphaned template can be re-associated with another tracker.
